PROFESSIONAL SUMMARY

Highly motivated Information Science & Engineering undergraduate (CGPA: 9.1+) with practical experience in Artificial Intelligence, Machine Learning, Full-Stack Development, Blockchain, and Automation. Proven ability to design and develop innovative solutions through academic and industry projects, including AI-powered productivity systems, fraud detection platforms, blockchain applications, and predictive analytics models. Skilled in Python, Java, JavaScript, React, MongoDB, and ML frameworks, with a strong passion for solving real-world problems through technology.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, HTML, CSS

Web Development: React.js, Node.js, Express.js, MongoDB, REST APIs

AIML: Scikit-Learn, Pandas, NumPy, Data Preprocessing, Regression Models, Predictive Analytics, Generative AI

Blockchain: Web3, Smart Contracts, Decentralized Applications (DApps)

Tools & Platforms: Git, GitHub, Power BI, VS Code, Jupyter Notebook, n8n Automation

EXPERIENCE

AIML Intern: DIGITALTRANSOLS AI PRIVATE LIMITED

Jan 2026 – May 2026

- Developed an AI-Based Sleep Tracking System integrated with n8n automation workflows.
- Built machine learning pipelines for sleep pattern analysis and productivity prediction.
- Worked on AI and Generative AI-based SaaS product development.
- Automated data collection, processing, and notification workflows using n8n.
- Applied data preprocessing, model training, and deployment methodologies.

Machine Learning Intern: Rinex

Mar 2025 – May 2025

- Developed machine learning models for predictive analysis and insight generation.
- Performed data cleaning, preprocessing, and feature engineering.
- Created visualizations and reports to support data-driven decision-making.
- Improved model performance through optimization techniques.

PROJECTS

AI-Based Sleep Tracking System with n8n Automation

- Developed an intelligent sleep monitoring system that predicts daily productivity using machine learning.
- Automated workflow management using n8n for data collection and processing.
- Generated personalized insights to improve user productivity and lifestyle habits.

Blockchain-Based Attendance Management System

- Built a decentralized attendance management platform using blockchain technology.
- Implemented tamper-proof attendance records using smart contract concepts.
- Ensured transparency, security, and immutability of attendance data.

TruMed – Medical Report Fraud Detection System

- Developed a web application for detecting fraudulent medical reports and certificates.
- Applied machine learning techniques for authenticity verification.
- Utilized Power BI for visualization and analytical reporting.

Employee Salary Prediction System

- Built predictive models using regression algorithms.
- Applied feature engineering and One-Hot Encoding techniques.
- Achieved accurate salary estimation using structured datasets.

SleepWise – Personalized Productivity Insights Through Sleep Pattern Analysis

- Developed machine learning models to analyze sleep patterns and forecast productivity levels.
- Generated personalized recommendations based on sleep behavior.

Mario-Style Adventure Game

- Developed an interactive browser-based game using HTML, CSS, and JavaScript.
- Implemented character controls, obstacles, scoring systems, and enemy interactions.

Decentralized Voting System

- Designed a blockchain-based voting platform ensuring transparency and vote integrity.
- Explored Web3 integration and smart contract-based voting mechanisms.

EDUCATION

Bachelor of Engineering: Visvesvaraya Technological University (CGPA: 9.1)

- Pursuing VTU Honours Program (18 Credits Completed)
- Areas of Specialization: Machine Learning, Data Analytics, Blockchain, Computer Networks, Parallel Computing

Pre-University: Narayana e-Techno School (Percentage: CBSE: 89%)

ACHIEVEMENTS & CERTIFICATIONS

- CGPA 9.1+ throughout engineering
- AIML Intern at DigitalTransols AI Pvt. Ltd.
- ML Intern at Rinex
- National Conference Presentation – Fraud Detection in Medical Reports
- NPTEL Programming in Java
- Advanced Java Certification
- Data Visualization Certification
- Successfully completed 6 VTU Honours Courses (18 Credits) in AI, Blockchain, Data Analytics, Networking, and Advanced Computing
- Participant – Junkyard Technical Event
