PROFILE

Motivated Information Science Engineering student with a strong academic record (CGPA 9+) and impactful projects. Enthusiastic about applying theoretical concepts to practical applications, with a passion for full-stack development, machine learning, and blockchain. My goal is to keep learning, innovating, and contributing to projects that blend software engineering with emerging tech.

EMPLOYMENT HISTORY

ML Intern, Rinex Mar 2025 – May 2025

- Developed ML models to analyze datasets and extract insights.
- Conducted data cleaning and preprocessing to improve accuracy.
- Built visualizations to present findings and aid decision-making.

EDUCATION

B.E., HKBK College of Engineering Dec 2022 – Present

- Consistent academic record with 9+ CGPA.
- Projects in blockchain, predictive modeling, and game development.

Pre-University, Narayana e-Techno School Jun 2018 – Mar 2020

- Secured **88%** with strong focus on mathematics and sciences.

SKILLS

- Full-Stack Development
- Machine Learning & Data Analysis
- Blockchain Development
- Problem Solving & Algorithms
- Software Design & Development

PROJECTS

Sleep Wise – Smart Sleep Tracking & Prediction App Mar 2025 – Present

- Built a full-stack app to analyze sleep patterns using ML models.

Employee Salary Prediction System Sep 2024 – Nov 2025

- Predicted salaries using regression algorithms.
- Preprocessed data with **OneHotEncoding** and feature engineering.

Blockchain-Enabled Decentralized Attendance System Dec 2024 – Feb 2025

- Developed blockchain solution ensuring immutability and transparency.

CERTIFICATES

- Certificate of Presentation in National Conference for Project on Fraud Detection (Apr 2025)
- Certificate of NPTEL in Programming in Java (Oct 2024)
- Certificate of completion in Value added course of Data Visualization (Jan 2024)
- Certificate of completion in Value added course of Advanced Java (July 2024)
- Certificate of participation in Junkyard event (Dec 2023)
